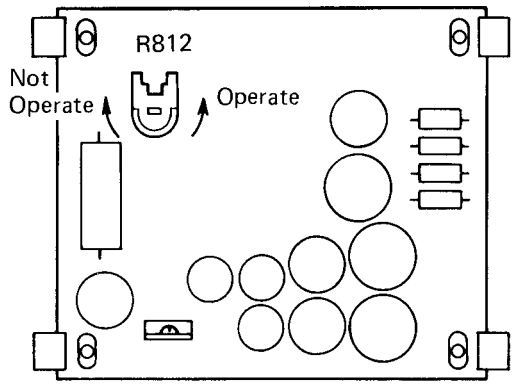

Fig. 19

CD-4 ADJUSTMENT

CD-4 adjustment is to match cartridge and stylus with built-in demodulator. Once it has been done it need not be done again until cartridge or stylus is changed.

1. Set source select to CD-4/PHONO.
2. Set mode select to discrete 4CH.

30kHz LEVEL ADJUSTMENT

The 30kHz sub-channel carrier output differs between cartridges and this screw on the rear panel is to adjust the level.

1. Turn the 30kHz level screw clockwise until the stop position.
2. On the inside band of CD-4 Adjustment Record there is a 400Hz sub channel signal (4kHz deviation). If the signal is distorted play BAND 4 on adjustment record and turn the screw counter-clockwise until a position is reached where distorted sound is not heard.
   Although distorted sound may still be heard, it might be acceptable in sound quality when playing CD-4 music records with setting remaining in the start position.
   If the sound is still unsatisfactory with CD-4 music record, the cartridge is then considered inadequate for CD-4 record reproduction.

SEPARATION ADJUSTMENT

1. Lower the volume of front speakers so that sound is only heared from the rear speakers.
2. Left Channel (CH-1, CH-2) Adjust : Turn the left control of Separation Adjust so that the volume of rear left (CH-2) is as low as possible while playing BAND 1 on the outside band of CD-4 demodulator adjustment record (4DE-205).
3. Right Channel (CH-3, CH-4) Adjust : Turn the right channel, in the same way, by turning Right Control to minimize the volume of rear right while playing BAND 2.
4. When operation have been completed, the adjustment is over and the volume of the front speakers should be turned up.

CHECK POINT AFTER REPAIR

Please make sure the following respect when repair is complets.

1. Each broadcasting frequency accords with dial scale accurately.
2. No abnormal oscillations occur in FM & AM reception.
3. Modulation hum is pratically not appreciable.
4. Normal gain and output are obtained.
5. Both high and low range of audio frequency are not decreased exceptionally.
6. S.E.A. Controls operate normally.
